## In the Claims

The status of claims in the case is as follows:

1	1. [Currently amended] A method for processing invoices
2	by having the individual employee of an enterprise creating
3	an original order for goods and services for end-use by said
4	individual employee determine that a resulting invoice
5	should be paid or not triggered upon a three-way match, said
6	three-way match assuring that the invoice match purchase
7	order terms and conditions, and the goods and services
8	received match those stated in quality and quantity against
9	said purchase order, said goods and services including goods
10	received through a receiving dock and for which a receipt is
11	generated, and goods and services not received through a
12	dock and for which a receipt is not generated, with invoices
13	for selected goods and services identified as pertaining to
14	items requiring positive confirmation, comprising the steps
15	of:

receiving at an enterprise accounting and catalog system from said individual employee a requisition for goods or services from a vendor for end-use by said individual employee;

16

17

18

20	said enterprise accounting and catalog system preparing
21	from said requisition a purchase order and identifying
22	said goods or services as items requiring one of
23	positive and negative confirmation;
24	said enterprise accounting and catalog system
25	submitting said purchase order selectively as one of an
26	EDI message and a paper purchasing document to said
27	vendor;
28	receiving from a first vendor an invoice for said goods
29	or services as an electronic invoice for processing by
30	said enterprise accounting and catalog system;
31	receiving from a second vendor an invoice for goods or
32	services as a paper invoice for processing to said
33	enterprise accounting and catalog system by accounts
34	payable personnel other than said individual employee;
35	preparing an invoice image of an invoice received for
36	said goods or services ordered by said individual
37	employee;
38	storing said invoice image in an image store;

keying s	said -	image	to	invoice	data;
----------	--------	-------	----	---------	-------

said enterprise accounting and catalog system
communicating by electronic mail a plurality of
confirmation requests to said individual employee
creating original orders for goods or services for end-
use by said individual employee, each said request
instructing said individual employee to log on to said
enterprise accounting and catalog system, including
said invoice data and a link to said invoice image, and
specifying that each said invoice pertains to an item
that is subject selectively to negative confirmation
and positive confirmation processing[[,]];

said negative confirmation processing for a first confirmation request including advising said individual employee via e-mail that said invoice is confirmed unless specifically not approved by said individual employee, and said positive confirmation processing for a second confirmation request including advising said individual employee that said invoice will be confirmed upon entry by said individual employee of approval that invoiced goods and services have been received in quality and quantity matching said purchase order;

- providing at a user workstation a search interface in said enterprise accounting and catalog system for said individual employee to enter criteria and have links to images of invoices that match said criteria be displayed at said user workstation; and
- responsive to selection of a link by said individual,
  displaying said invoice image for approval by said
  individual creating said original order selectively by
  said negative confirmation and positive confirmation
  processing.
  - 1 2. [Original] The method of claim 1, further comprising
    2 the step of:
  - preparing said invoice images by scanning paper
    invoices received from a vendor.
  - 1 3. [Previously presented] The method of claim 2, further
    2 comprising the step of:

- 3 preparing other of said invoice images by converting
- 4 electronic invoices received from a vendor into an
- 5 image file representation having the look of a paper
- 6 invoice.
- 1 4. [Previously presented] The method of claim 1, said
- 2 invoice confirmation request advising said individual
- 3 employee to process said confirmation as negative
- 4 confirmation or a positive confirmation.
- 1 5. [Previously presented] The method of claim 4, said
- 2 invoice confirmation request further advising said
- 3 individual employee to log on to a front-end requisition and
- 4 catalog server to view invoices for confirmation.
- 1 6. [Previously presented] The method of claim 5, further
- 2 comprising the step responsive to said individual employee
- 3 logging on to said front-end server of displaying a list of
- 4 invoices awaiting confirmation and responsive to user
- 5 selection of a selected invoice, presenting images of
- 6 invoices corresponding to links selected by said individual
- 7 employee.
- 1 7. [Previously presented] The method of claim 1, further

- 2 comprising the steps of presenting to said individual
- 3 employee an interface for selecting images of invoices
- 4 matching a selection criteria.
  - 8. [Canceled]
- 9. [Currently amended] A system for processing invoices
- 2 by having the individual employee creating an original order
- 3 for goods or services for end use by said individual
- 4 determine that a resulting invoice should be paid or not
- 5 triggered upon a three-way match, said three-way match
- 6 assuring that the invoice match purchase order terms and
- 7 conditions, and the goods and services received match those
- 8 stated in quality and quantity against said purchase order,
- 9 said goods and services including goods received through a
- 10 receiving dock and for which a receipt is generated, and
- 11 goods and services not received through a dock and for which
- 12 <u>a receipt is not generated, with invoices for selected goods</u>
- and services identified as pertaining to items requiring
- 14 positive confirmation, comprising:
- a front-end requisition and catalog system;
- 16 a back-end procurement services system;

an image system and store for storing said scanned	ĺ
images and serving them to said workstation keyed	to
said invoice:	

a workstation selectively receiving user entry from said individual employee of a requisition request for goods or services for end-use by said individual employee, receiving confirmation requests, and viewing images of invoices from said image system and store; said confirmation request instructing said individual employee to log on to said back-end system to view and approve a first invoice by negative and a second invoice by positive confirmation processing, said negative confirmation processing including advising said individual employee via e-mail that said invoice is confirmed unless specifically not approved by said individual employee, and said positive confirmation processing including advising said individual employee that said invoice will be confirmed upon entry by said individual employee of approval;

said front-end system selectively receiving said requisition requests from said workstation, forwarding said requisition requests to said back-end system, identifying said goods or services as items requiring one of positive and negative confirmation, and receiving confirmation requests from said back-end system for forwarding to said workstation; and

said back-end system selectively issuing purchase orders against said requisitions to a vendor at least one invoice as electronic invoice and another invoice as a paper purchase order, receiving and processing invoices electronic invoices directly from said vendor and paper invoices as received and processed by accounts payable personnel other than said individual employee, keying invoice images to invoice information, and processing confirmation requests to said front-end system for communication to said workstation for approval by said individual employee creating said original order for goods or services for end use by said individual employee that invoiced goods and services have been received in quality and quantity matching said purchase order.

58 .

- [Currently amended] A program storage device readable 1 10. by a machine, tangibly embodying a program of instructions 2 executable by a machine to perform a method for processing 3 invoices by having the individual employee creating an 4 5 original order as an end user of a commodity or service determine that a resulting invoice should be paid or not 6 triggered upon a three-way match, said three-way match 7 8 assuring that the invoice match purchase order terms and conditions, and the goods and services received match those 9 10 stated in quality and quantity against said purchase order, said goods and services including goods received through a 11 receiving dock and for which a receipt is generated, and 12 13 goods and services not received through a dock and for which a receipt is not generated, with invoices for selected goods 14 15 and services identified as pertaining to items requiring
- 17 receiving a plurality of invoices;
- 18 preparing for each said invoice an invoice image;

positive confirmation, said method comprising:

- storing said invoice image in an image store;
- 20 keying said image to invoice data;

communicating first and second invoice confirmation
requests to said individual employee, each said request
including said invoice data for respective invoice
confirmation requests and respective links to invoice
images:

responsive to requester selection of a first link, displaying a corresponding invoice image to said individual employee for approval by said individual employee creating said original order according to a specified confirmation process; said individual employee processing a first invoice by a negative confirmation process including advising said individual employee via e-mail that said first invoice is confirmed unless specifically not approved by said individual employee, and said individual employee processing a second invoice by a positive confirmation process including advising said individual employee that said invoice will be confirmed upon entry by said individual employee of approval that invoiced goods and services have been received in quality and quantity matching said purchase order.

71	positive confirmation processing.

- 1 12. [Previously presented] The program storage device of claim 10, said method further comprising:
- preparing said invoice images by scanning paper
  invoices received from a vendor.
- 1 13. [Previously presented] The program storage device of claim 12, said method further comprising:
- preparing other of said invoice images by converting

  electronic invoices received from a vendor into an

  image file representation having the look of a paper

  invoice.

- 1 14. [Previously presented] The program storage device of
- 2 claim 10, said invoice confirmation request advising said
- 3 individual employee to process said confirmation as negative
- 4 confirmation or a positive confirmation.
- 1 15. [Previously presented] The program storage device of
- 2 claim 14, said invoice confirmation request further advising
- 3 said individual employee to log on to a front- end
- 4 requisition and catalog server to view invoices for
- 5 confirmation.
- 1 16. [Previously presented] The program storage device of
- 2 claim 15, said method further comprising responsive to said
- 3 individual employee logging on to said front-end server of
- 4 displaying a list of invoices awaiting confirmation and
- 5 responsive to selection of a selected invoice by said
- 6 individual employee, presenting images of invoices
- 7 corresponding to links selected by said individual employee.
- 1 17. [Previously presented] The program storage device of
- 2 claim 10, said method further comprising presenting to said
- individual employee an interface for selecting images of invoices matching a selection criteria.
